DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in —

(1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effect under this subsection of a national application published under section 122(b) only if the international application designating the United States was published under Article 21(2)(a) of such treaty in the English language; or

(2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that a patent shall not be deemed filed in the United States for the purposes of this subsection based on the filing of an international application filed under the treaty defined in section 351(a);

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Dixon et al. ("Dixon"). Dixon discloses a press fit connector comprising housing 21 provided with holes 24 and pins 12, each pin with a shoulder part and pin part, secured by forcing shoulder parts (26, 28) through the holes, wherein the holes include gaps (see figure 7) formed between the shoulder parts and the inner walls 32 of the holes, wherein the housing is adapted to (i.e. capable of) being removed by a tool as specified.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 2833

Claim 2 is rejected under 35 U.S.C. 103(a) as being unpatentable over Dixon as in claim 1 in view of the admitted prior art. The Dixon gaps are capable of receiving a housing removing tool. Dixon does not show stepped parts on the house. Dixon suggests that the form of the housing is not particularly critical to the invention (see col. 3, lines 29-33). The admitted prior art includes a housing including a stepped portion useful for facilitating removal of the housing. At the time of the invention, it would have been obvious to form the Dixon housing with a stepped portion as suggested by the admitted prior art. The suggestion or motivation for doing so would have been to facilitate removal of the housing with a tool as taught in the admitted prior art (specification at page 4, lines 20-25).

Response to Arguments

Applicant argues that Dixon does not disclose the "shoulder and gap adopted to be removed" Remarks, page 4. The examiner disagrees. Dixon discloses the claimed shoulders and gaps. Regarding whether the housing and gaps are adapted to be removed, all that is required for the prior art reference structure to read on the claimed structure is that the prior art structure be capable of being used in the claimed manner. *R.A.C.C. Industries Inc. v. Stun Tech Inc.*, 49 USPQ.2d 1793 (Ct. App. Fed. Cir. 1998). The prior art does not have to disclose that the structure is actually used in the claimed manner. Id.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Art Unit: 2833

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
